INDEX FOR VOLUME 67

*Articles*

Ansari, Asim, Jedidi, Kamel & Dube, Laurette. *Heterogeneous factor analysis models: A Bayesian approach*. 49–77.

Bechger, Timo M., Verstralen, Huub H.F.M., & Verhelst, Norman D. *Equivalent linear logistic test models*. 123–136.

Bentler, Peter M. (see Kim, Kevin H.)

Bentler, Peter M. (see Yuan, Ke-Hai)

Bjorner, Jakob Bue. (see Christensen, Karl Bang)

Brusco, Michael J. *A branch-and-boung algorithm for fitting anti-Robinson structures to symmetric dissimilarity matrices*. 459–471.

Bushman, Brad J. (see Yuan, Ke-Hai)

Chan, Wai. (see Poon, Wai-Yin)

Chang, Hua-Hua & Zhang, Jinming. *Hypergeometric family and item overlap rates in computerized adaptive testing* 387–398.

Christensen, Karl Bang, Bjorner, Jakob Bue, Kreiner, Svend, & Petersen, Jørgen Holm. *Testing unidimensionality in polytomous Rasch models*. 563–574.

Dimitriadou, Evgenia, Dolnicar, Sara, & Weingessel, Andreas. *An examination of indexes for determining the number of clusters in binary data sets*. 137–159.

Dolnicar, Sara. (see Dimitriadou, Evgenia).

Dube, Laurette. (see Ansari, Asim)

Formann, Anton K. & Ponocny, Ivo. *Latent change classes in dichotomous data*. 437–457.

Heslenfeld, Dirk J. (see Huizenga, Hilde M.)

Huizenga, Hilde M., Heslenfeld, Dirk J., & Molenaar, Peter C.M. *Optimal measurement conditions for spatiotemporal EEG/MEG source analysis* 299–313.

Hwang, Heungsun & Takane, Yoshio. *Generalized constrained multiple correspondence analysis*. 211–224.

Ip, Edward H. *Locally dependent latent trait model and the Dutch identity revisited*. 367–386.

Jedidi, Kamel. (see Ansari, Asim)

Jennrich, Robert I. *A simple general method of oblique rotation*. 7–19.

Kim, Kevin H. & Bentler, Peter M. *Tests of homogeneity of means and covariance matrices for multivariate incomplete data*. 609–623.

Kreiner, Svend. (see Christensen, Karl Bang)

Krijnen, Wim P. *On the construction of all factors of the model for factor analysis*. 161–172.

Lee, Sik-Yum & Zhu, Hong-Tu *Maximum likelihood estimation of nonlinear structural equation models* 189–210.

Lee, Sik-Yum. (see Song, Xin-Yuan)

Maris, Eric. (see Maris, Gunter)

Maris, Gunter & Maris, Eric. *A MCMC-method of models with continuous latent responses*. 335–350.

Marshall, Linda L. (see Yuan, Ke-Hai)

McDonald, Roderick P. *What can we learn from the path equations?: Identifiability, constraints, equivalance*. 225–249.

Molenaar, Peter C.M. (see Huizenga, Hilde M.)

Ogasawara, Haruhiko. *Concise formulas for the stardard errors of component loading estimates* 289–297.

Petersen, Jørgen Holm. (see Christensen, Karl Bang)

Ponocny, Ivo. (see Formann, Anton K.)

Poon, Wai-Yin & Chan, Wai. *Influence analysis of ranking data*. 421–436.

Rocci, Roberto & ten Berge, Jos M.F. *Transforming three-way arrays to maximal simplicity*. 351–365.

Shapiro, Alexander & ten Berge, Jos M.F. *Statistical inference of minimum rank factor analysis*. 79–94.

Sidiropoulos, Nikolaos D. (see ten Berge, Jos M.F.)

Song, Xin-Yuan & Lee, Sik-Yum. *Analysis of structural equation model with ignorable missing continuous and polytomous data* 261–288.

Stout, William. *Psychometrics: From practice to theory and back*. 485–518.

Takane, Yoshio. (see Hwang, Heungsun)

ten Berge, Jos M.F. (see Rocci, Roberto)

ten Berge, Jos M.F. (see Shapiro, Alexander)

ten Berge, Jos M.F. & Sidiropoulos, Nikolaos D. *On uniqueness in CANDECOMP/PARAFAC*. 399–409.

Thomas, Neal. *The role of secondary covariates when estimating latent trait population distribution*. 33–48.

van Onna, M.J.M. *Bayesian estimation and model selection in ordered latent class models for polytomous items*. 519–538.

van der Linden, Wim J. (see Veldkamp, Bernard P.)

Veldkamp, Bernard P. & van der Linden, Wim J. *Multidimensional adaptive-testing with constraints on test content*. 575–588.

Verhelst, Norman D. (see Bechger, Timo M.)

Verstralen, Huub H.F.M. (see Bechger, Timo M.)

Victoria-Feser, Maria-Pia. *Robust inference with binary data*. 21–32.

Weingessel, Andreas. (see Dimitriadou, Evgenia).
Yuan, Ke-Hai & Bentler, Peter M. *On normal theory based inference for multilevel models with distributional violations.* 539–561.
Yuan, Ke-Hai & Bentler, Peter M. *On robustness of the normal-theory based asymptotic distributions of three reliability coefficient estimates* 251–259.
Yuan, Ke-Hai & Bushman, Brad J. *Combining standardized mean differences using the method of maximum likelihood.* 589–607.
Yuan, Ke-Hai & Marshall, Linda L. *A unified approach to exploratory factor analysis with missing data, nonnormal data, and in the presence of outliners.* 95–121.
Zhang, Jinming. (see Chang, Hua-Hua)
Zhu, Hong-Tu. (see Lee, Sik-Yum)

*Notes and Comments*
Cléroux, Robert. (see Lazraq, Aziz)
Lazraq, Aziz & Cléroux, Robert. *Testing the significance of the successive components in redundancy analysis.* 411–419.

*Reviews*
McDonald, Roderick P. Review of *Causality: Models, Reasoning, and Inference* by Judea Pearl. 321–322.
van de Veleden, Michel. Review of *Innovations in Multivariate Statistical Analysis* by R.D.H. Heijmans, D.S.G. Pollock, and A. Satorra (Eds.). 317–319.
Wainer, Howard. Review of *The Visual Display of Quantitative Information* by Edward R. Tufte. 173–178.

*Errata*
Ponocny, Ivo. *Nonparametric goodness-of-fit tests for the Rasch model.* 315.
